Date : 2021/02/23

BluSapphire Technologies Inc (Head Office: 68, Southfield Avenue, Two Stamford Landing, Suite 100 Stamford CT 06902, USA, CEO Kiran Kumar Vangaveti) and **Indo-Sakura Software Japan Ltd.** (Head Office: 3-5-7 Toyo, Koto-ku, Tokyo, Japan), a leading provider of ICT services and solutions since 2005, announced today that they have partnered to provide integrated cyber defense solutions to small and medium-sized businesses in Japan.

■ BluSapphire Intelligent Cyber Defense.

The threat landscape has changed dramatically in recent years, and threat adversaries have become far more capable. Today's cyber-attacks are organized crime, and if not detected and responded to quickly, they can cause significant damage to an organization.

Traditional cyber threat detection capabilities, such as antivirus and firewalls, are not sufficient to detect advanced cyber-attacks. Globally, it has been found that cyber-attacks have gone undetected for more than 210 days.

To detect advanced cyber-attacks, organizations need to deploy threat detection capabilities that study attacker behaviors and patterns, and at the same time automate threat response.

BluSapphire is the industry's first integrated cyber defense stack that leverages AI and ML capabilities with an efficient security big data lake to simultaneously analyze network, machine, and user behavior to provide multi-vector threat detection capabilities. The platform is self-organizing and is the only proven agentless, automated threat response, remediation, and proactive, action-driven live threat hunt. BluSapphire provides threat detection, response, and remediation capabilities beyond those of today's XDR.

- It detects, responds to, and remediates threats, and protects against cyber-attacks before they happen.
- A cloud-native, seamlessly integrated platform for any scale.
- One platform for all your cyber defense needs

Service name	Stack	Detail
SIEM	BluSIEM	Your next-gen SIEM platform for seamless log ingestion/ integration with Cloud Services, SaaS applications, Security/ Network Infrastructure, and Standard/ Custom Applications with 1280 Use Cases built-in and counting.
Threat Detection	Threat Intelligence	Back your next-gen SIEM module up with the highest standard of threat intelligence, curated from multiple sources, including research agencies, OSINT, and commercial feeds
UEBA	BluHeraldry- UEBA	Entity analysis and predictive threat management at all scales of operation, powered by Big Data and Intelligence, driven by Machine Learning to offer complete visibility of User and Entity activities over Computers, the Network, and Cloud Activities simultaneously
EDR	BluGenie- EDR	The only agentless response and remediation tool in the market today offering complete visibility on user endpoints such as laptops and desktops, both stationary and remote, wherever your users may be working from. The BluGenie Endpoint Detection and Response tool offers
NBAD	BluNAF- NBAD	Complete visibility of your networks on your premise and for your cloud infrastructure, with ML-driven Signal Intelligence (SIGINT) in the identification of malicious activities over Encrypted Traffic channels.
Sandbox	BluEye- Sandbox	Identification of hidden/ unknown malicious files being downloaded by users proactively by performing Real-time Static and Binary Analysis of files downloaded without any introduction of latency over network/ for users.
Threat Hunt	BluSniper- Threat Hunt	Proactive identification of attacks at the initial stage with consistent, live, automated, behavior-driven, agentless threat hunting that's 300% more effective than current methods, without reliance on historical log data.
EPP	BluArmour- EPP	Endpoint protection for air-gapped networks, ICS control system networks, and traditional IT environments, exclusively built to support any version of Windows Operating Systems and protect it from Ransomware/ Zero-day/ file-less malware activities.
	BluSOAR	The most sophisticated threat triage & response module anywhere in the world today. BluSOAR combines single-click triage from 110+ threat intel sources with real-time threat response, both automated and manual. Go one step further with automated or manual remediation, and manage the entire security incident lifecycle in one go
Deception	BluActivedefence	Deploy authentic, scalable decoys across your infrastructure. Log and monitor attacks on these decoys, speed up your detection times even further, and create dependable data on your Indicators of Compromise.

■ Indo-Sakura Business Model

Kiran Kumar Vangaveti, CEO BluSapphire Technologies Inc says :

We are excited to partner with Indo-Sakura and bring our incredibly successful unified defense platform that goes beyond XDR, to SME market in Japan. Nowadays threat actors are relentless in their pursuit of victims and do not discriminate by size. This has negatively impacted SMEs who are unable to shore up their defenses to enterprise level largely due to size and complexity involved. BluSapphire’s technology in partnership with Indo-Sakura’s team empowers SMEs to scale up their cyber defense posture and improve cyber resilience while reducing complexity.

About G14 Solutions LLC

G14 Solutions LLC D. B. A. BluSapphire Technologies, is an exciting cybersecurity product company based out of USA providing SaaS services to its clients spread across US, EU and Asia. Our Technology has won multiple industry recognitions and has proven success stories across the globe.
